

Radar & Software Requirements

Specifications

InSight™ Radar 2 (IR2)

The Nobeltec InSight Radar is a fully functional digital radar that interfaces with the award-winning Visual Navigation Suite or Nobeltec Admiral for integration with a laptop or desktop computer. Each radar connects directly to your computer and sends a video image, processed by revolutionary InSight Technology for a cleaner picture. There are numerous display settings to choose from including a dedicated radar display, a split screen with radar and chart in separate windows or radar overlaid on top of your electronic chart.

Basic Installation Sample

Which program is right for you?

When purchasing a new InSight Radar, you have your choice of either Visual Navigation Suite or Nobeltec Admiral. Both are excellent programs and are loaded with features.

| Radar Features                           | VNS | Admiral |
|--|-----|---------|
| Full Screen Radar (PlanView) and Overlay | X   | X       |
| Customizable Radar Toolbars (PlanView)   | X   | X       |
| Off-Centering Radar Mode                 | X   | X       |
| Auto-Ranging, Gain and Sea Clutter       | X   | X       |
| Guard Zone                               | X   | X       |
| Variable Range Marker (VRM)              | X   | X       |

| NavView User Interface                |     | X       |
| Vessel Management System Included     |     | X       |
| Comprehensive Target Tracking         |     | X       |

Minimum System Requirements

- Microsoft® Windows® 2000/XP
- 1 GHz Pentium® class processor or better
- 128 MB RAM – 256 MB or more for XP
- 16 MB video card  
(Multiple cards required for multi-monitor support)
- 32 bit color SVGA-compatible display  
(Minimum Resolution: 800x600)
- TCP/IP network port
- GPS or magnetic heading sensor
- 100 MB available hard disk space  
(Additional space required for charts or other data)
- Available serial port for GPS and Heading Sensor connection\*
- Available USB/Parallel port for dongle  
(Admiral only. Dongle used for international charts, COM port activation and H.Q. security)
- 12x or higher CD-ROM drive
- Mouse or other pointing device

\* If you do not have an available serial port, a USB to serial adapter may be purchased separately, requiring only an available USB port.

Power Requirements

- 12VDC power source for the InSight Radar or InSight Radar Box 2
- 24 VDC if using Double Speed feature within InSight Radars

Important Notice on 2kW Dome

The Nobeltec 2kW Dome varies from other IR2 radar models. If you are purchasing this radar, please be aware of the following differences.

- Uses RS-422 to a Sea Level USB connection device instead of TCP/IP.
- Radar resolution up to 480x480
- Scanline, Radar Presets, Auto Sea, Auto Gain, Double Speed and Off-Centering features are not available.

Nobeltec®  
InSight™ Radar2 (IR2)

The all-new IR2 leverages the power of the PC to bring together the world's best navigation software with the familiarity of traditional radar to create the ultimate navigation system. IR2 offers unparalleled chart plotting and radar abilities that provide higher resolution and greater confidence.

IR2 surpasses traditional radar systems through its use of the award-winning Visual Navigation Suite and Nobeltec Admiral. These navigation programs make the IR2 easy-to-use, affordable to update and provide functionality not found on other radars. What's more, Nobeltec's IR2 models can be connected to a vessel-wide network providing all of your nav stations with radar and chart plotting data for true redundancy.

The new IR2 – Bringing together the best of traditional navigation and advanced technology.

Provides Radar Overlay Capabilities

Easily Adjustable Radar Settings

View As A Stand-Alone Radar

1024 x 1024 Radar Resolution

Radar Interpretation Made Easier

Choose from a 2 kW 16 Mile Radome  
to a 25 kW 96 Mile Open Array

# InSight™ Radar 2 (IR2™)

## Nobeltec Software

### Nobeltec Admiral

While IR2 radars are compatible with both of Nobeltec's navigation software programs, Admiral adds advanced functionality for even greater power.

**NavView**  
Admiral's NavView includes easy-to-read information read-outs and large oversized buttons that are perfect for touchscreens and rough water navigation. With NavView, navigating has never been easier!

**Full Screen Radar**  
Using the Full Screen option in Admiral's NavView user interface mode adds an exclusive Radar Information Panel that provides valuable information about your vessel and radar settings.

**Multi-Monitor Support**  
Use a single computer to display Admiral on up to seven monitors. Use the View Manager to easily configure each display to your exact specifications, making it easy to know exactly what's going on around your vessel.

**GlassBridge Network Support**  
Instant sharing of NMEA data, radar overlay, nav objects and Passport charts between all computers on the network. Configure multiple computers and install charts only once!

## Nobeltec Radar Features

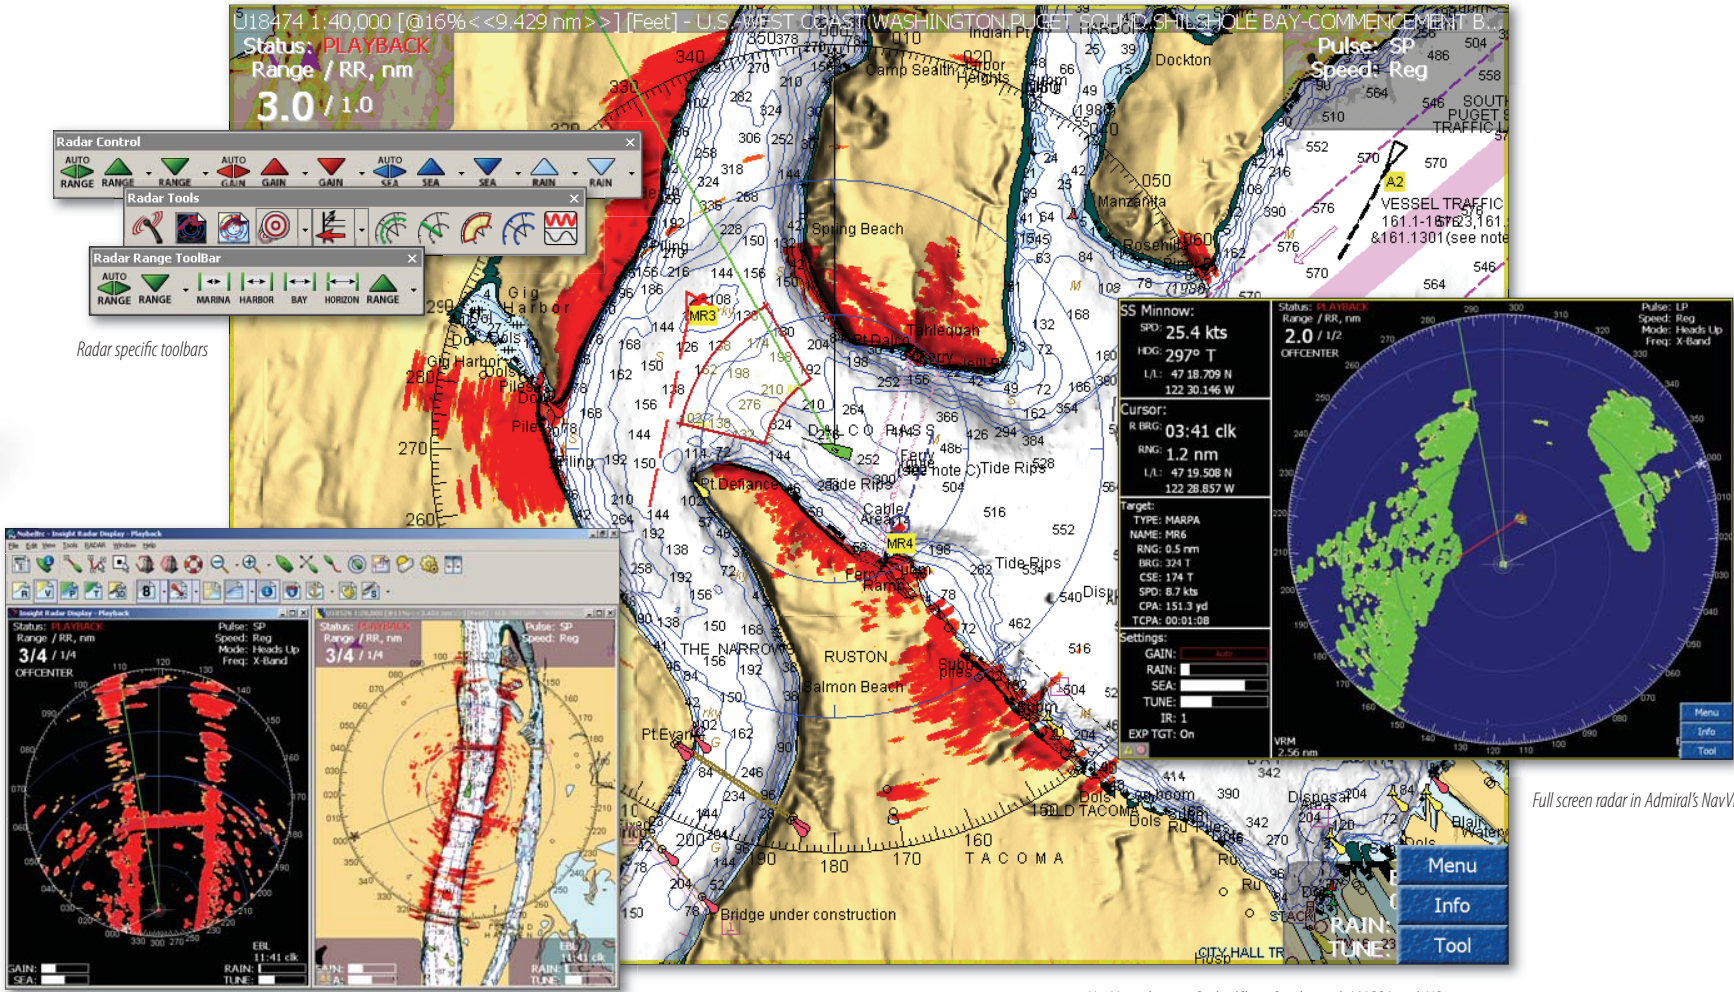

### IR2 - Higher Resolution... Greater Confidence™

Nobeltec's IR2 changes the way you think about radar systems. IR2 combines a fully functional Nobeltec digital radar with the best selling Visual Navigation Suite or Nobeltec Admiral for integration with your laptop or personal computer. Nobeltec Radars connect directly to your computer and sends a digital video image, processed by revolutionary InSight Technology, for a clearer radar display. Nobeltec InSight Radar's provide you with higher resolution and greater confidence.

**1024 x 1024 Radar Resolution and User-Definable Colors**  
Using simple controls within the software, the digital radar image on the PC screen is displayed at a resolution of 1024 x 1024 and can be set to your own color specifications.

**Guard Zone and Electronic Bearing Lines**  
InSight Radars provide you with the ability to easily display Guard Zones and Electronic Bearing Lines to help monitor your surroundings for possible dangers. Click and drag for instant adjustment.

**Full Screen Radar**  
The Full Screen option in Admiral's NavView user interface adds an exclusive Radar Information Panel which provides valuable information about your vessel and radar.

SplitScreen InSight radar window off-centered and a chart window with overlay

NavView showing Radar/Chart Overlay with MARPA and AIS targets

**Multiple Viewing Options**  
Using Visual Navigation Suite or Admiral, you can view your radar image as a stand-alone window, overlaid on top of an electronic chart, or both, using Nobeltec's SplitScreen™ mode (shown above).

**Comprehensive Target Tracking**  
Admiral clearly displays AIS and Radar targets and warns you of the dangers they pose based on range, bearing and speed. Detect threats based on your own time and range criteria and add precious time to your decision making process.

**Easy-to-Read Navigation and Radar Information**  
When using Admiral's full screen dedicated radar window, all radar information such as Boat Position, Range and Bearing, Speed, Gain, Sea-Clutter and Target Information can be viewed in the Radar Info Panel.

## A Sample of Nobeltec's Radar Features

### PC Integration

Each InSight Radar model comes loaded with powerful tools that make using the radar simple and easy-to-use. Some of the many powerful new features include:

**Auto-Range**  
With chart overlay, Auto-Range automatically adjusts the range of the radar to match the scale of the chart. As you zoom in and out on the chart, or change the radar range, the two are kept in sync to create a consistent view.

**Point and Click Radar**  
Most IR2 features can be activated using a few simple mouse clicks. For example, MARPA targets can be acquired by simply pointing at the radar target and clicking. Targets can then be monitored by speed, closest point of approach and course.

**Pulse Control**  
Although InSight Radars automatically adjust the pulse length of the radar to match your range settings, they also allow you to select between long and short pulse lengths to improve the radar image for conditions such as weather.

**Auto-Gain and Auto-Sea**  
Nobeltec allows you to specify Sea Clutter and Gain preset settings for your radar. After these presets are configured, Auto-Gain and Auto-Sea help you to maintain a consistent radar image as the radar range changes.

**Chart and Radar Orientation**  
Many radars only allow you to view your radar image in Heads Up. InSight Radars improve upon that tradition and provide you with the ability to view both the chart and radar image and Heads Up, Course Up, Leg Up, North Up, and Off Center with Look Ahead.

**Double Speed**  
IR2 has an option to set the radar antenna rotation to double speed. By doubling the rotation speed, updates occur more frequently to provide speedy and accurate radar images. (Admiral only feature, requires 24V power connection)
